

PYTHON DEVELOPER

KARMAZIN DMITRY

ABOUT ME

Python Backend Developer with 2+ years of non-commercial experience in building scalable backend services using FastAPI. Experienced in developing production-ready systems from scratch — from architecture design and database modeling to deployment and maintenance.

Strong academic background in algorithms, mathematical modeling, numerical optimization, and computer simulations. Skilled in Python, C++, Java, and C#, with solid OOP fundamentals, asynchronous programming experience, and a strong interest in backend architecture, performance optimization, and clean code practices.

TECHNICAL SKILLS

Programming Languages:

Python, C++, Java, C#, JavaScript, Maple

Backend & Tools:

FastAPI, SQLAlchemy, Redis, Celery, Docker, Django

Databases:

PostgreSQL, MySQL, MongoDB

Practices & Concepts:

OOP, REST API design, asynchronous programming, algorithm design, performance optimization, testing

DevOps & Environment:

Linux, GitHub, GitLab

Methodologies:

Scrum / Agile

CONTACTS

HOBBIES

- Solving math and logical problems
- Working on complex challenges
- Optimization and efficiency
- Reading books
- Souls-like games

EXPERIENCE & PROJECTS

PYTHON BACKEND DEVELOPER

2022 – 2025

- Developed backend services using Python and FastAPI
- Designed and implemented scalable RESTful APIs
- Built applications from scratch to production, including:
 - system architecture design
 - environment configuration and deployment
- Worked with databases:
 - PostgreSQL, MySQL, MongoDB
 - ORM: SQLAlchemy (models, migrations, complex queries)
- Implemented caching, rate limiting, and performance optimizations using Redis
- Developed asynchronous background tasks and schedulers with Celery
- Containerized applications using Docker
- Integrated external APIs and third-party services
- Wrote unit and integration tests using PyTest and Unittest
- Worked in Linux environments (server setup, deployment)
- Used Git (GitHub / GitLab) with proper branching and code review practices
- Participated in Scrum / Agile processes

EDUCATION

OLES HONCHAR

DNIPRO NATIONAL UNIVERSITY

Bachelor's degree in Computer Modeling and Programming Technologies

- Gained strong foundation in mathematical modeling, algorithms, and data analysis.
- Developed projects using C++, C#, Python, and Java for solving applied computational problems.
- Studied computer simulation techniques and applied them to real-world scenarios.
- Learned modern programming technologies and applied them in team and individual projects.
